Admin Side

Login

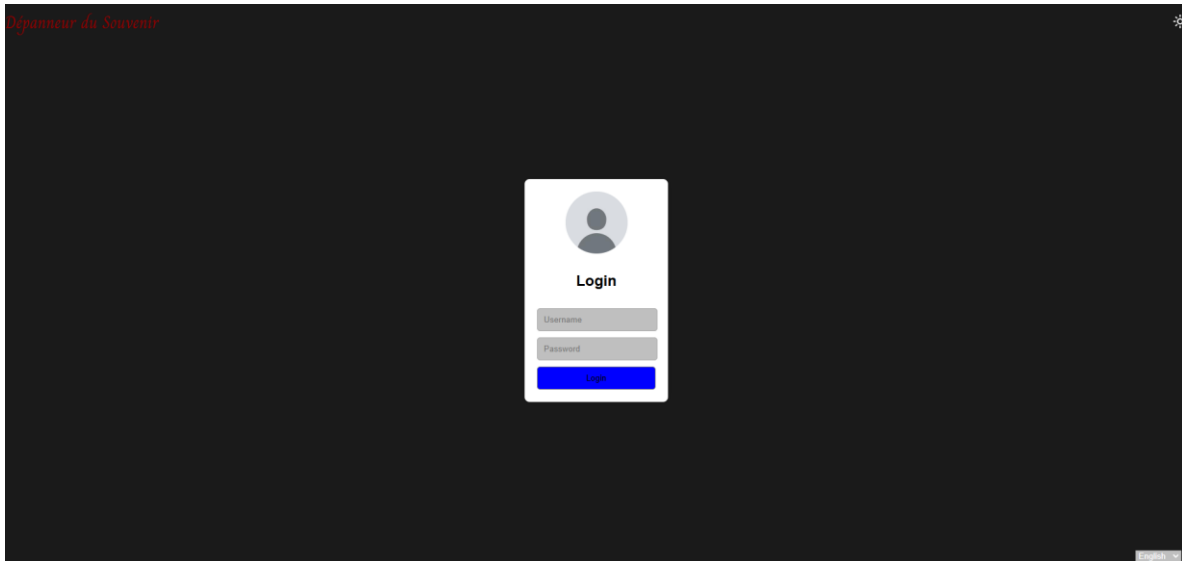

Here is the Login Page, where you need to put your credentials to log in to the Store Management System. On the bottom right, you will see a dropdown box, with the option to change language English to French:

On the top right, you have an icon that allows you to toggle the web page between dark mode and light mode:

Dark mode:

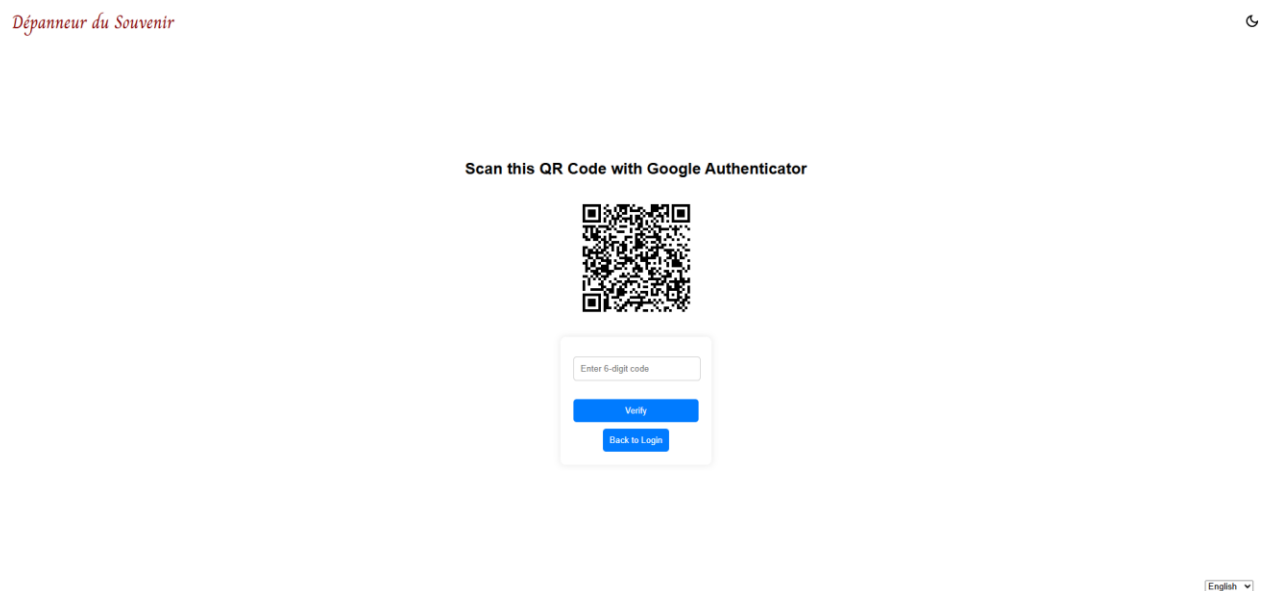

Login credential:

In the beginning, when you first start using the website, the username is **admin**, and the password is **12345**.

2FA:

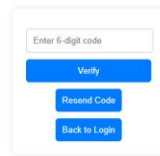

Once you login to the website, it will lead you to this page:

This is a Two- Factor Authentication where you need to download Google Authenticator App to login. The user just needs to then scan the QR code from the app and enter the verification code.

Now, if this isn't the first time the user logs in to the website, it will show this page:

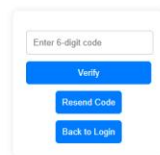

Enter your Google Authenticator code

A white rectangular box with a thin border. Inside, at the top, is a text input field with the placeholder text "Enter 6-digit code". Below the input field are three blue buttons with white text, stacked vertically: "Verify", "Resend Code", and "Back to Login".

English ▼

This page just asks for the code, because the Google Authenticator app always keeps the verification code there (the verification updates approximately every 30 seconds). The page will look like this:

Enter your Google Authenticator code

A white rectangular box with a thin border. Inside, at the top, is a text input field with the placeholder text "Enter 6-digit code". Below the input field are three blue buttons with white text, stacked vertically: "Verify", "Resend Code", and "Back to Login".

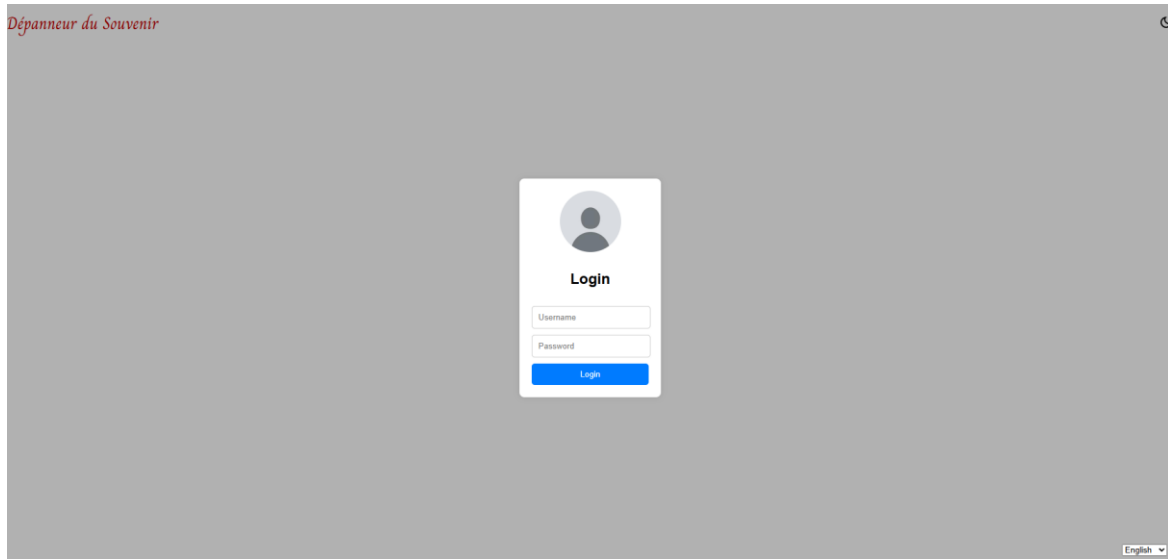

English ▼

In this case, the user just needs to put the verification code, and they can login.

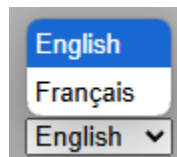

If they need a new verification code, they can press on the "Resend Code" which will lead them to the 2FA page with the QR code, so they can rescan the code.

For Employees:

Login

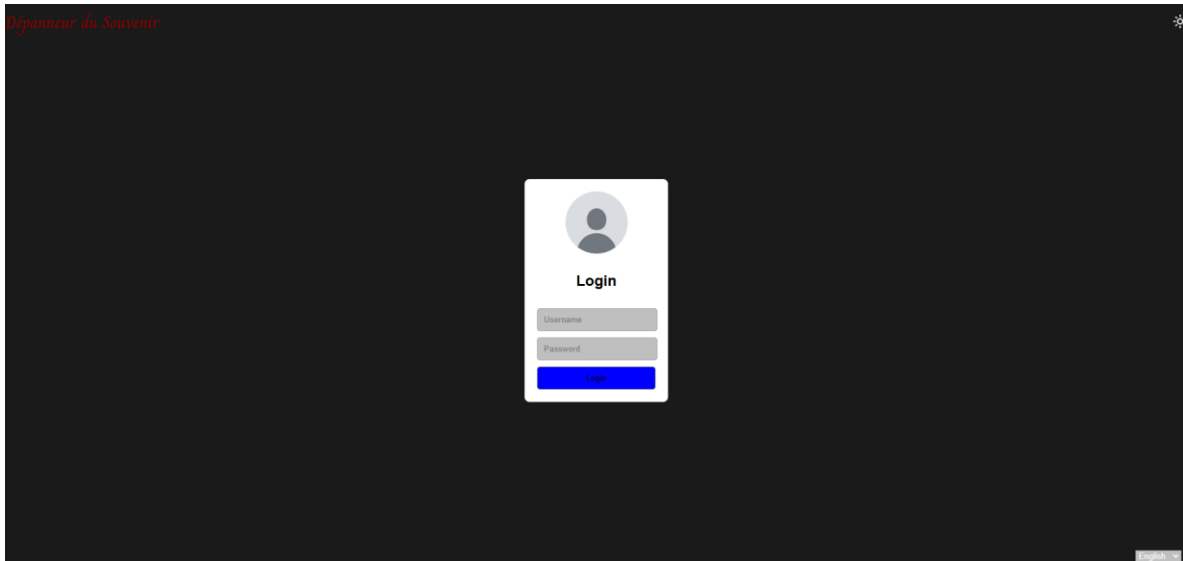

Here is the Login Page, where you need to put your credentials to log in to the Store Management System. On the bottom right, you will see a dropdown box, with the option to change language English to French:

On the top right, you have an icon that allows you to toggle the web page between dark mode and light mode:

Dark mode:

Login credential:

In the beginning, when you first start using the website, the username and password will be provided by the/an admin. If you want to change your credentials, you will be able to do so after logging-in and going to the settings page. More information in the settings section.

2FA:

Once you login to the website, it will lead you to this page:

Dépanneur du Souvenir

Scan this QR Code with Google Authenticator

Verify

Back to Login

English

This is a Two- Factor Authentication where you need to download Google Authenticator App to login. The user just needs to then scan the QR code from the app and enter the verification code.

Now, if this isn't the first time the user logs in to the website or inputs a wrong code, it will show this page:

Enter your Google Authenticator code

This page just asks for the code, because the Google Authenticator app always keeps the verification code there (the verification updates approximately every 30 seconds).

In this case, the user just needs to put the verification code, and they can login.

If they need a new verification code, they can press on the "Resend Code" which will lead them to the 2FA page with the QR code, so they can rescan the code.
